Delivery Performance SLA Analysis

Supervised by : Mariam Metawe’e
Mentor : Ibrahim Mohamed

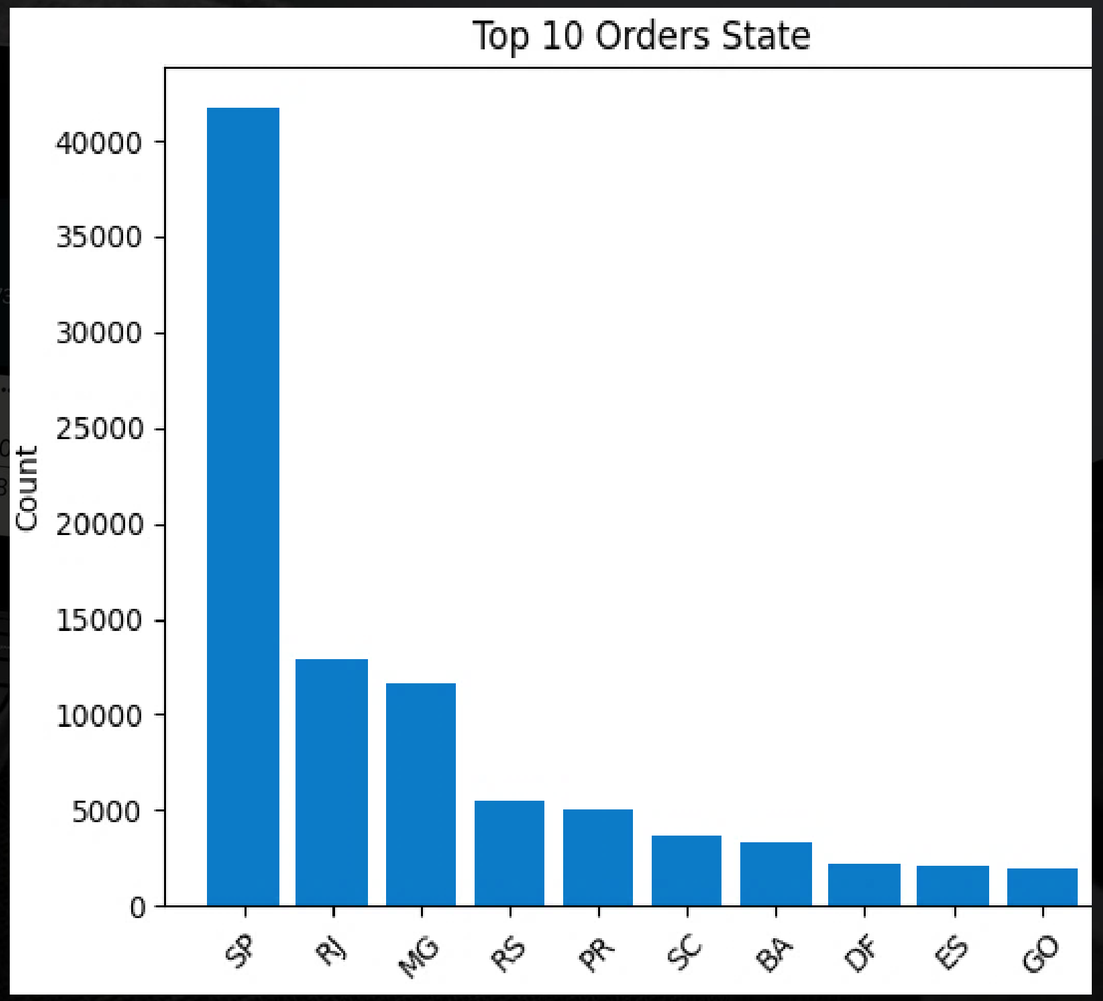
Data Overview

112,650	$13,591,643	May	$6.15M	$7.38M	19.9%
Units Sold	Total Revenue	Peak Month	2017 Revenue	2018 Revenue	Annual Growth

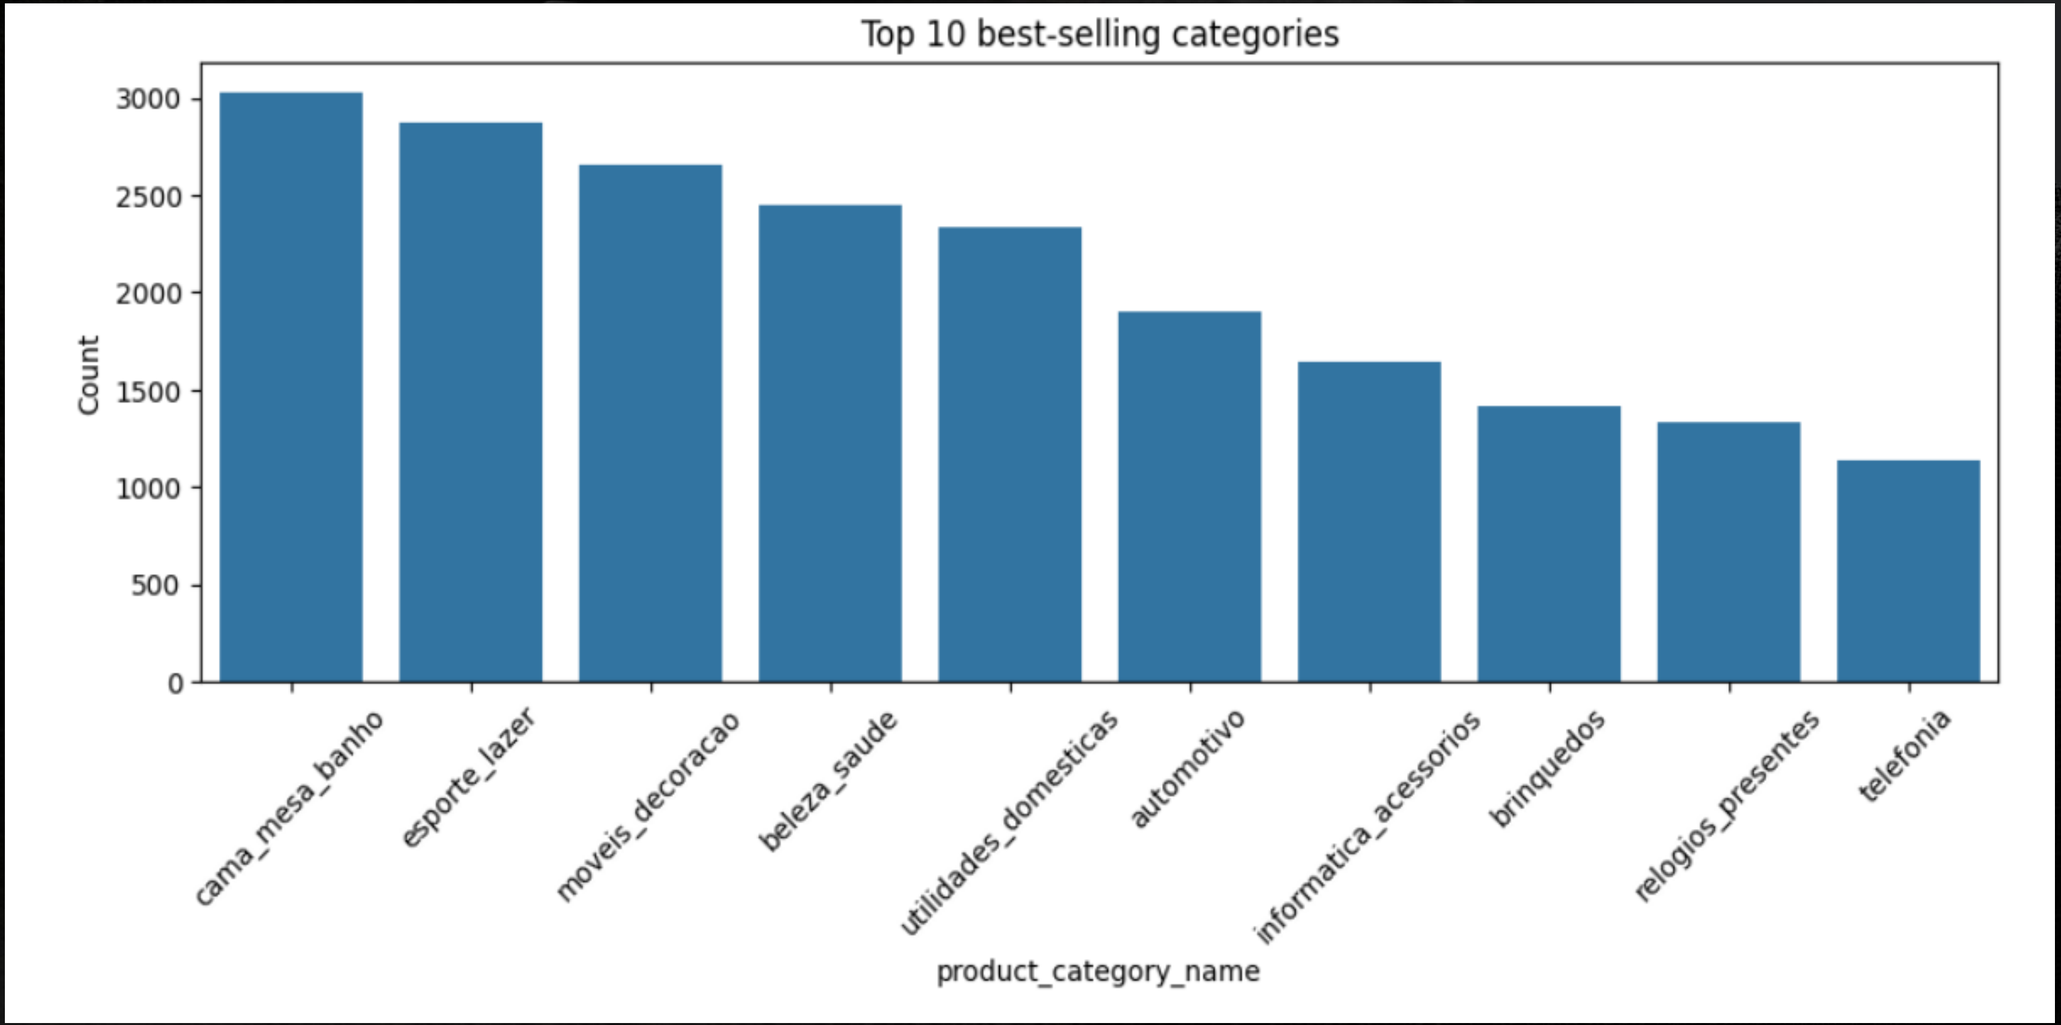
99,441	96,478	3.12%
Total Orders	Delivered	Repeat Buyers
2016–2018	97% of all orders	Low retention rate

Customer Analysis

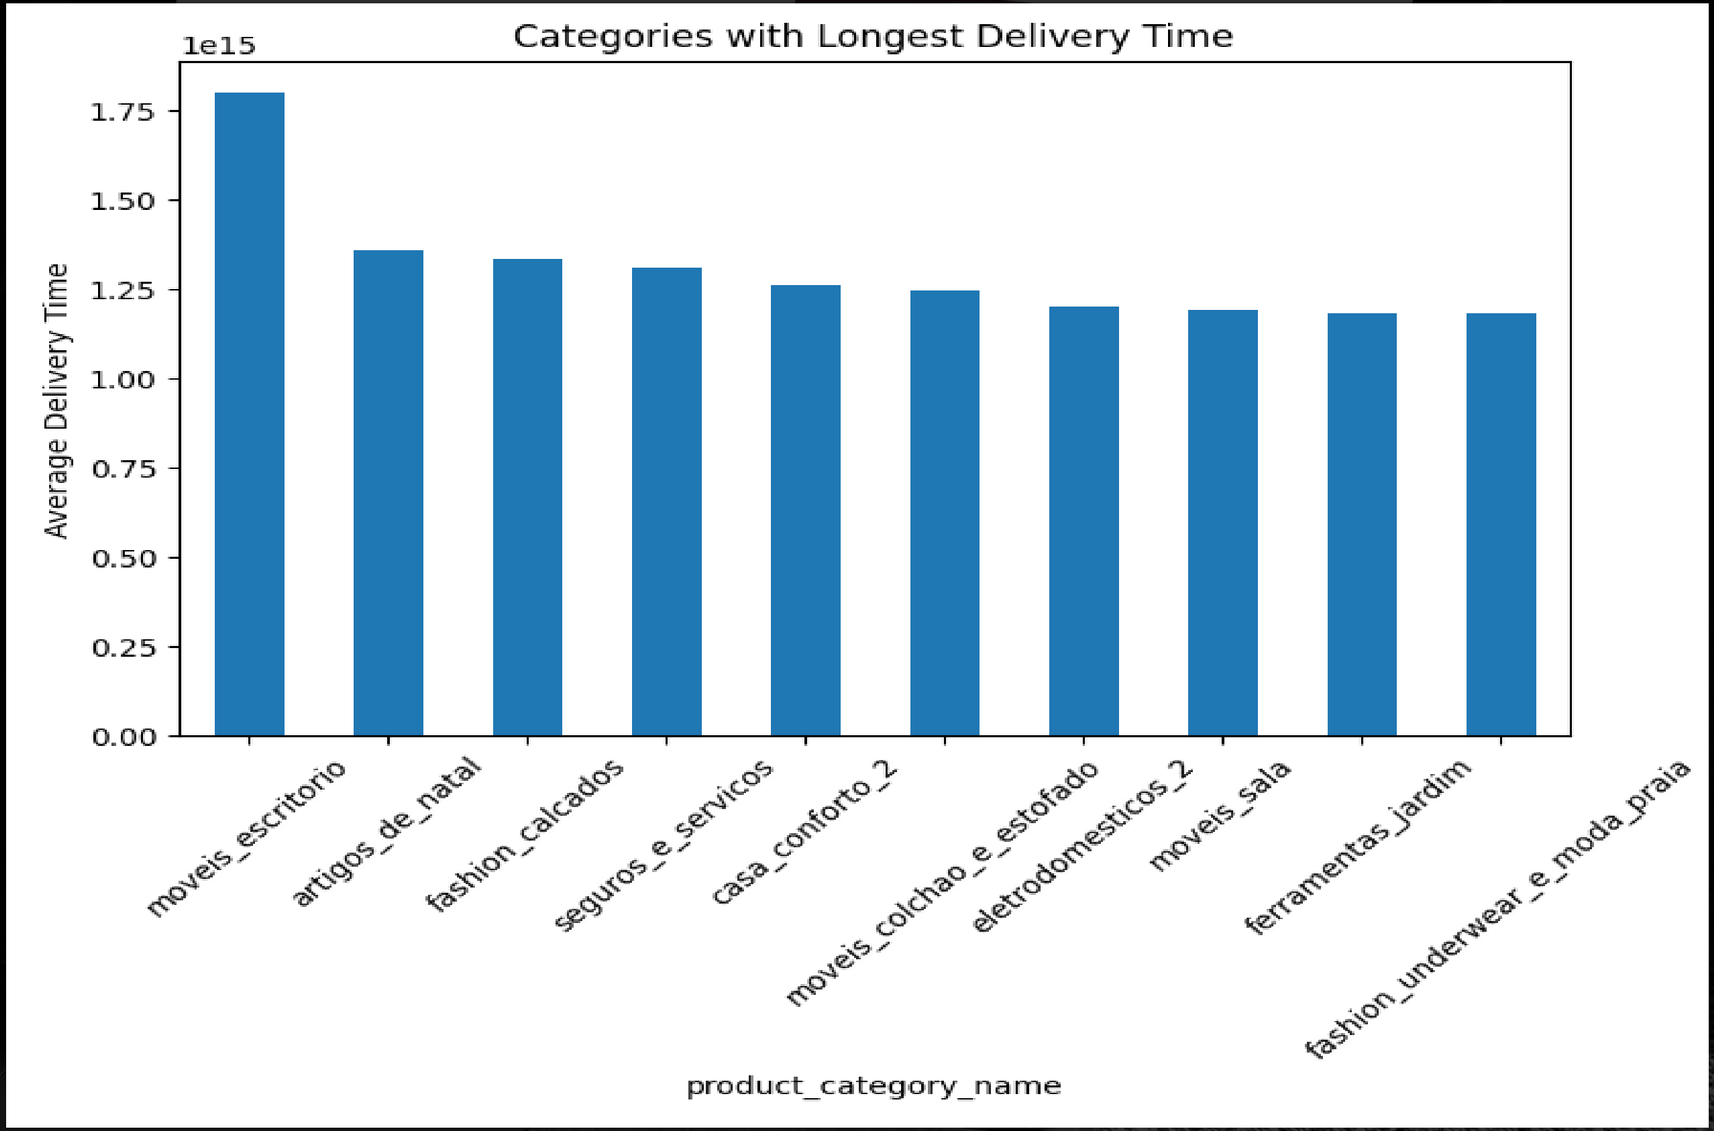
- Demand is significantly higher in a few states.
- São Paulo (SP) dominates the platform with the largest number of orders followed by Rio de Janeiro (RJ) and Minas Gerais (MG)



Best-selling categories



Categories with Longest Delivery Time



Average actual delivery time

12
Day

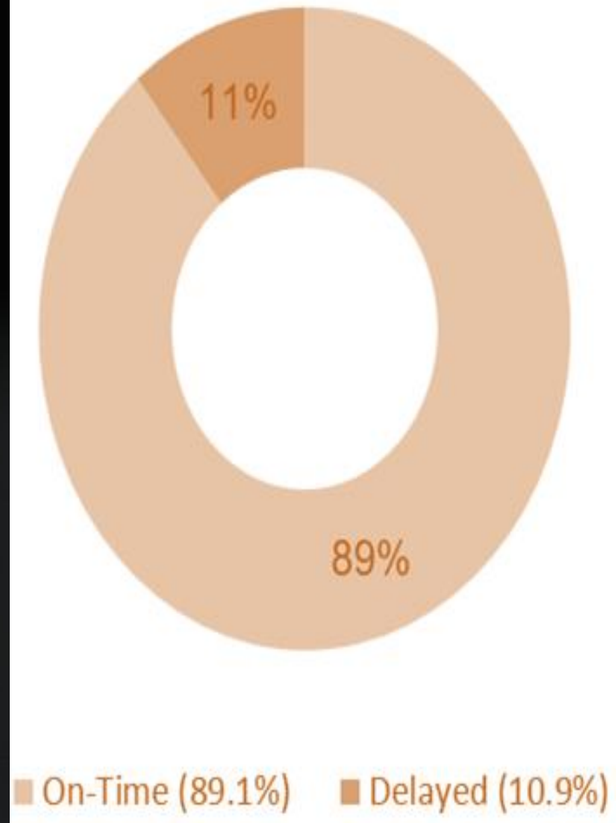
The average actual arrival time is about **12 days**, which is quite high and suggests **significant delivery delays**.

Compliance rate with the SLA

89%

The majority of orders were delivered within the estimated delivery time

On Time Delivery Analysis



88,649
On-Time Orders

10,792
Delayed Orders

89.1%
SLA Rate

188 Days
Max Delay

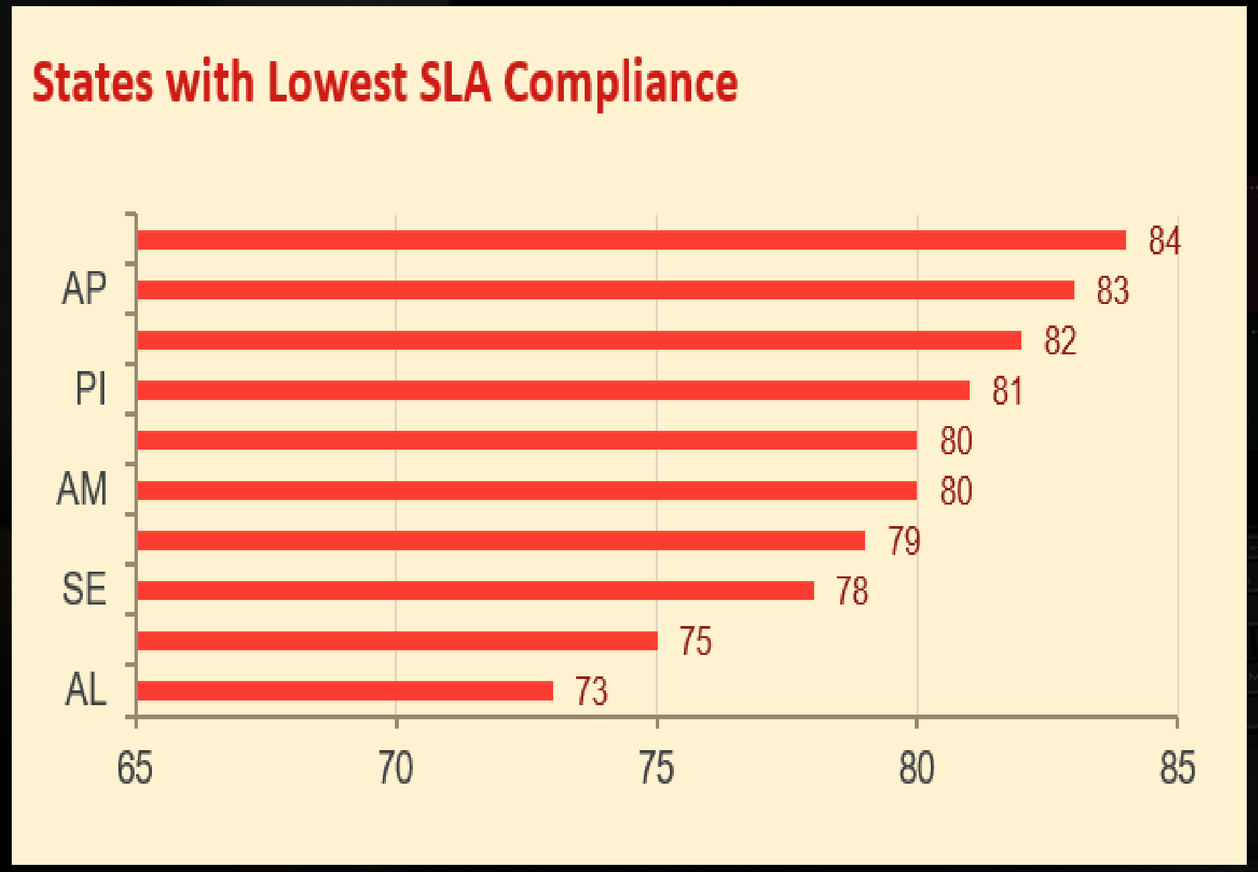
12 Days
Avg. Lead Time

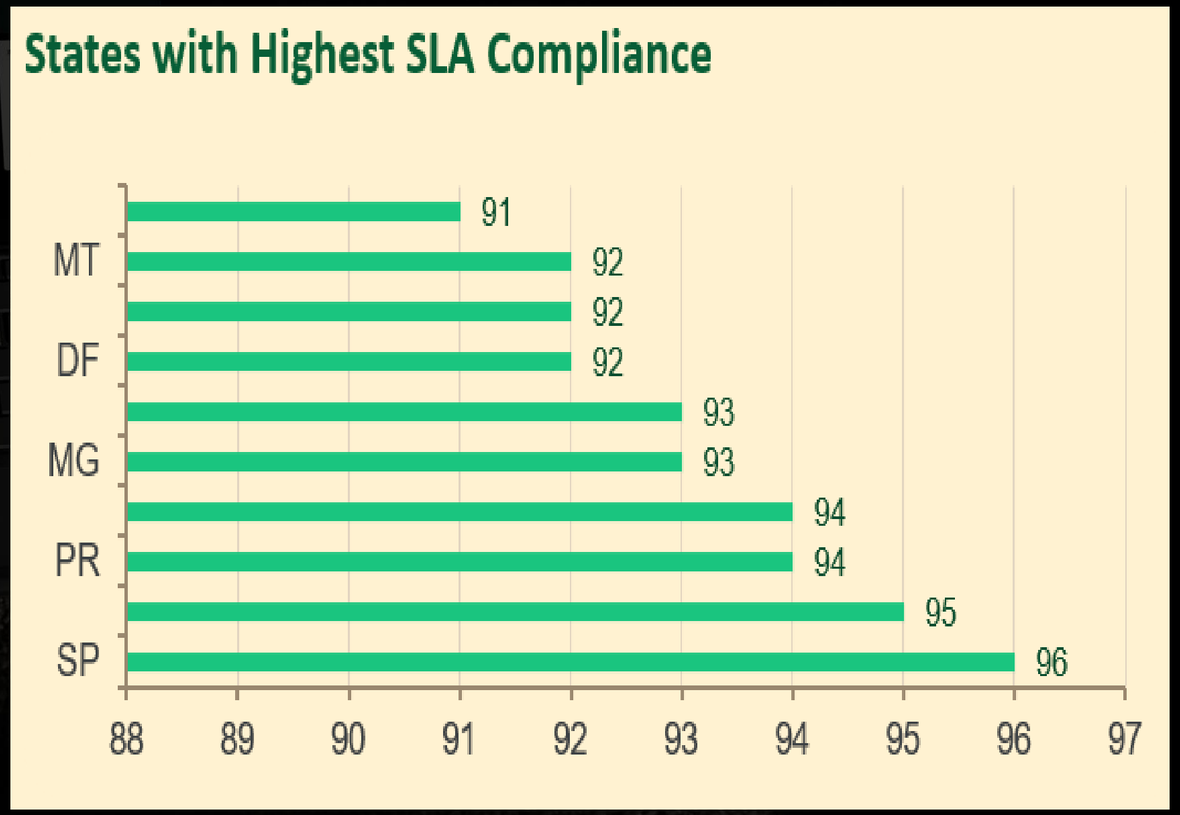
23 Days
Est. Lead Time

Actual delay orders

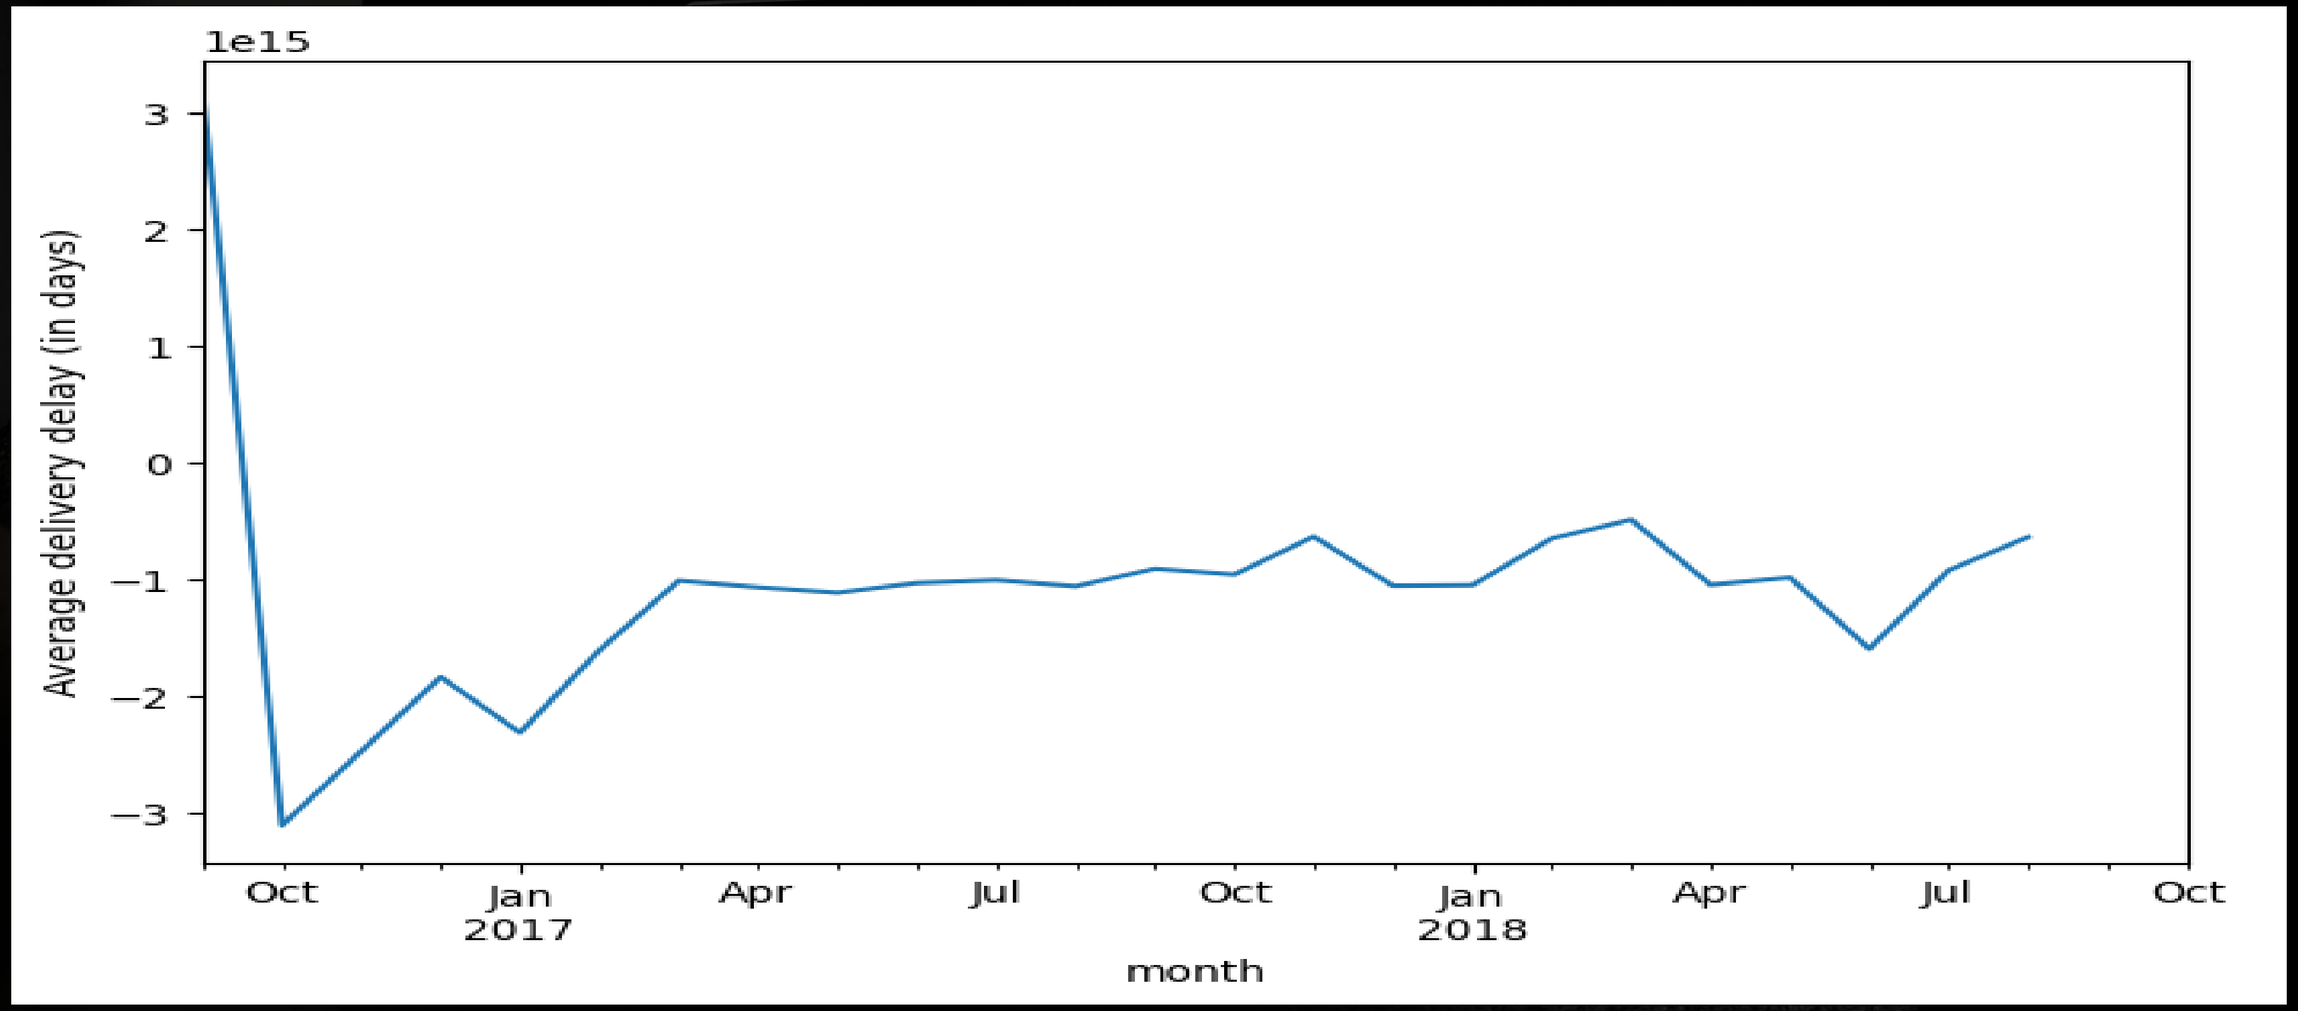
Approximately 11% of orders failed to meet the SLA requirements, **with about 9.6% representing actual delivery delays while the rest are related to order cancellations or product unavailability.**

States Level Delivery Performance



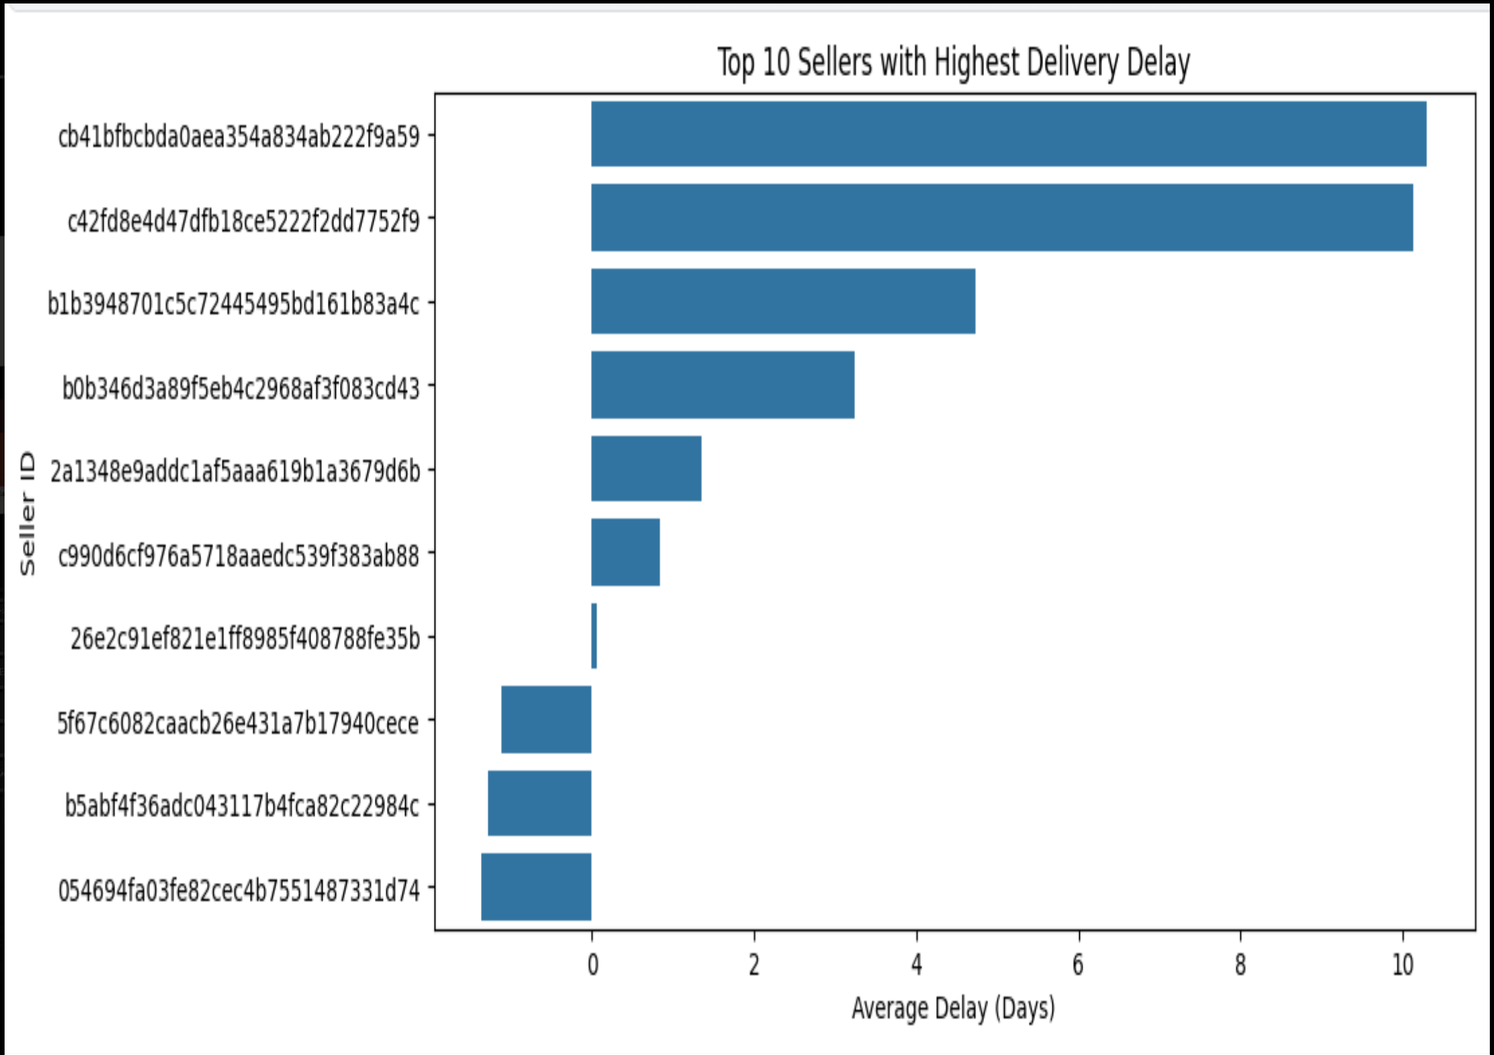


Trend of delay over time

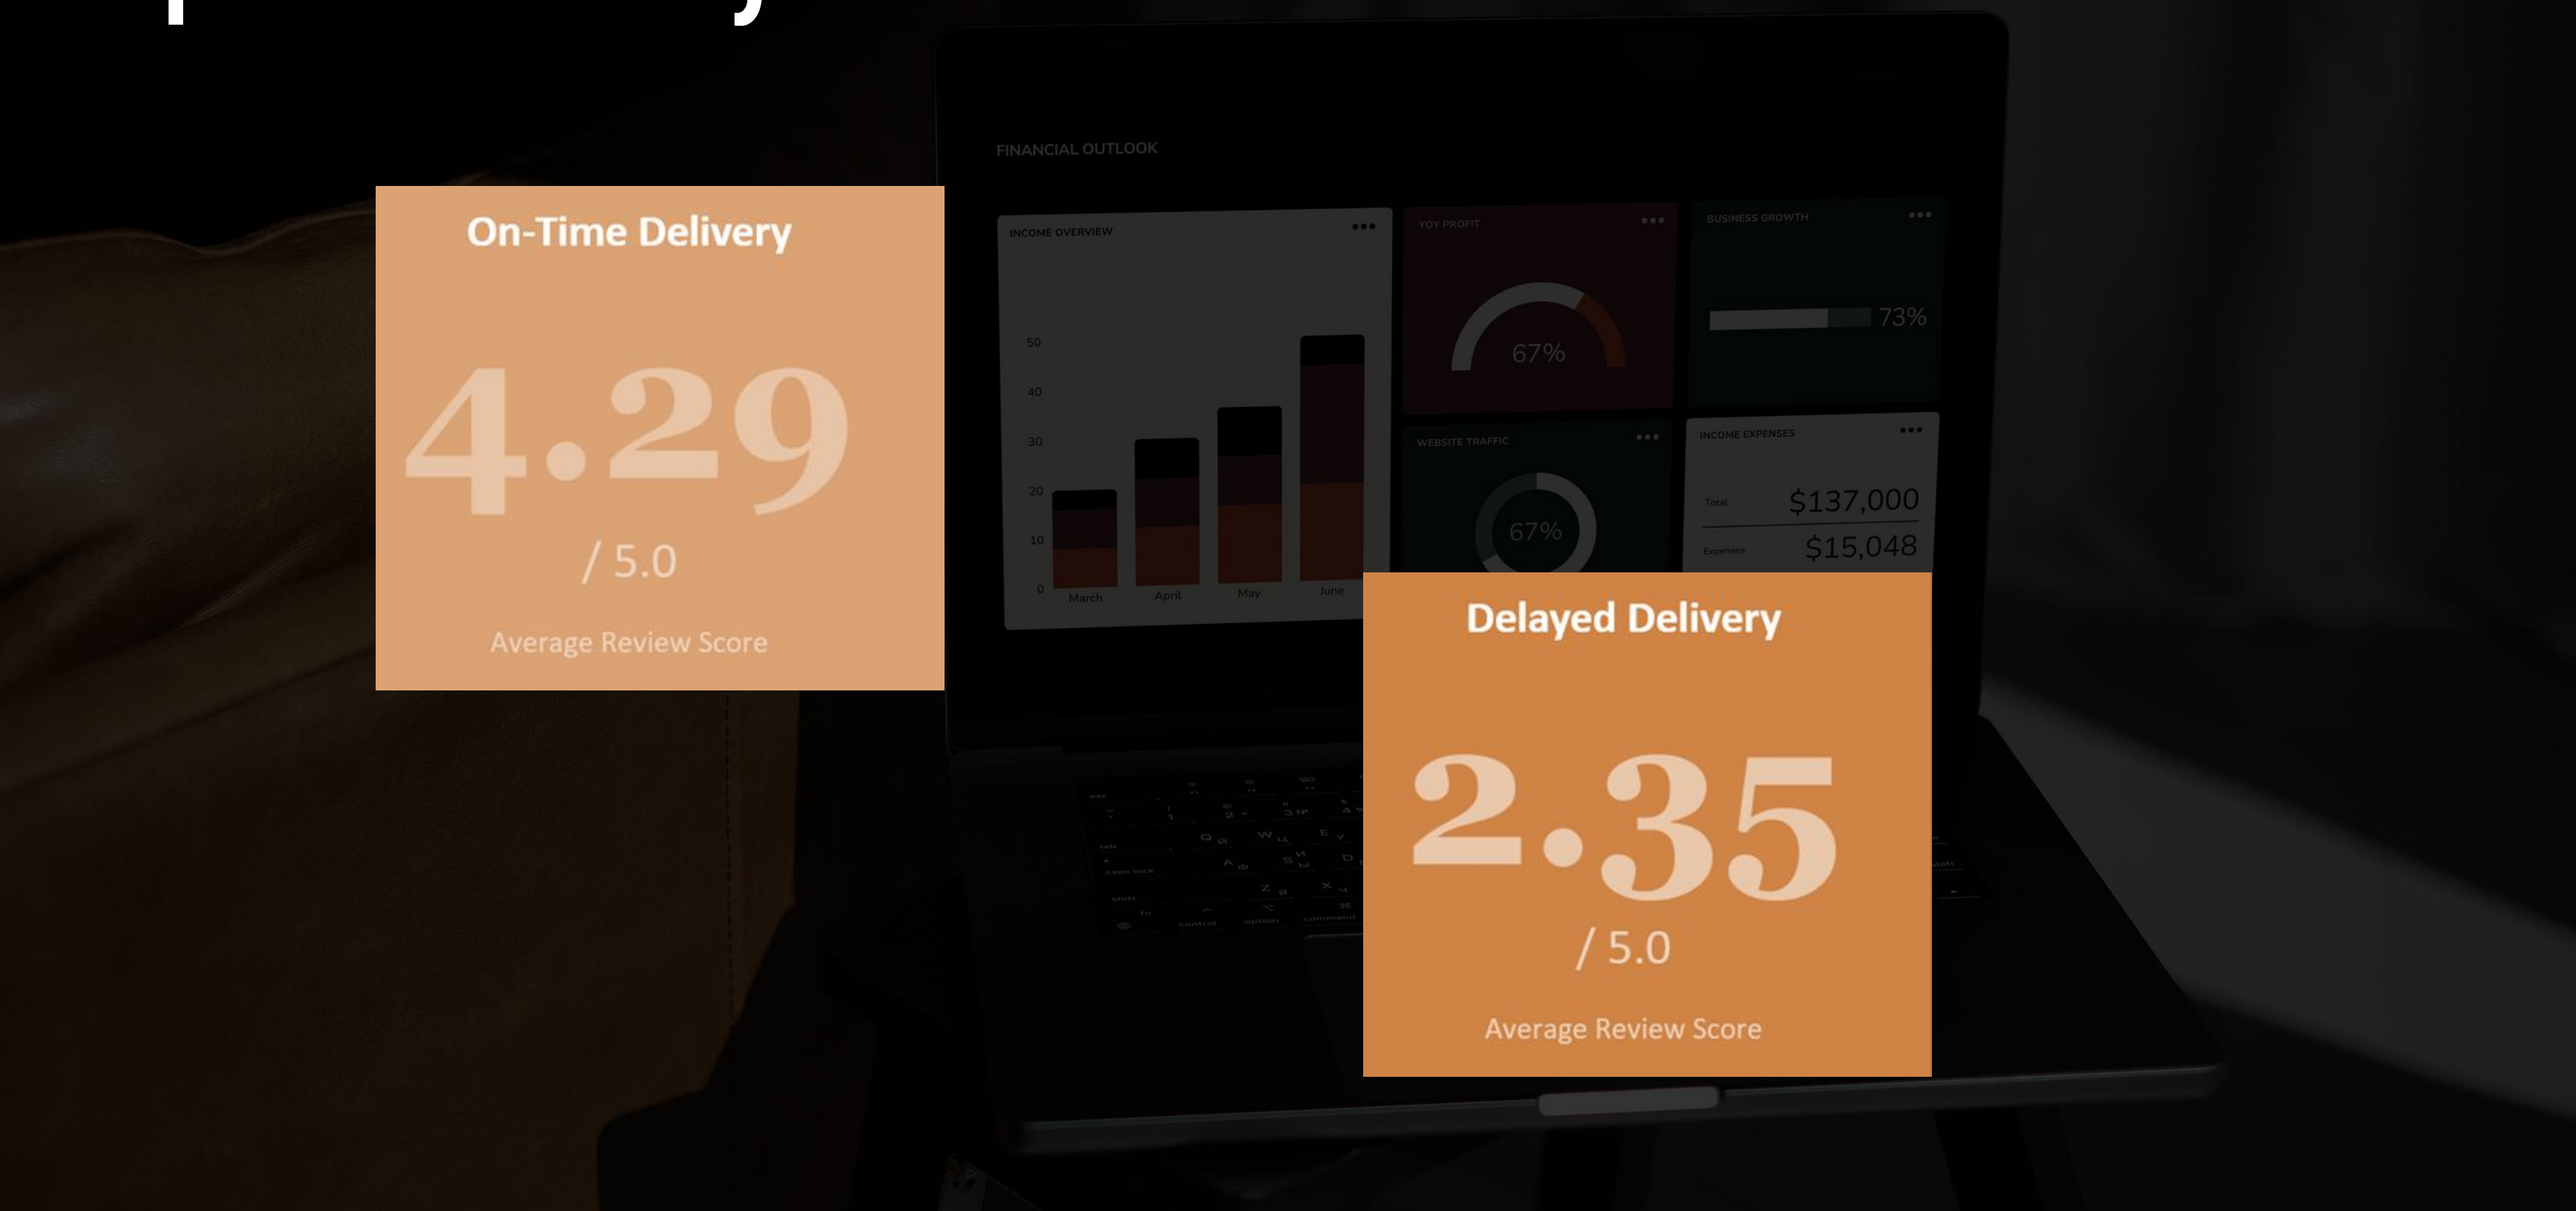


Most sellers with delays

Most sellers deliver on time or even earlier than expected, but a few sellers show significant delays (up to ~10 days). These sellers are likely the main contributors to overall delivery performance issues



Impact of Delivery on Reviews



On-Time Delivery

Average Review Score

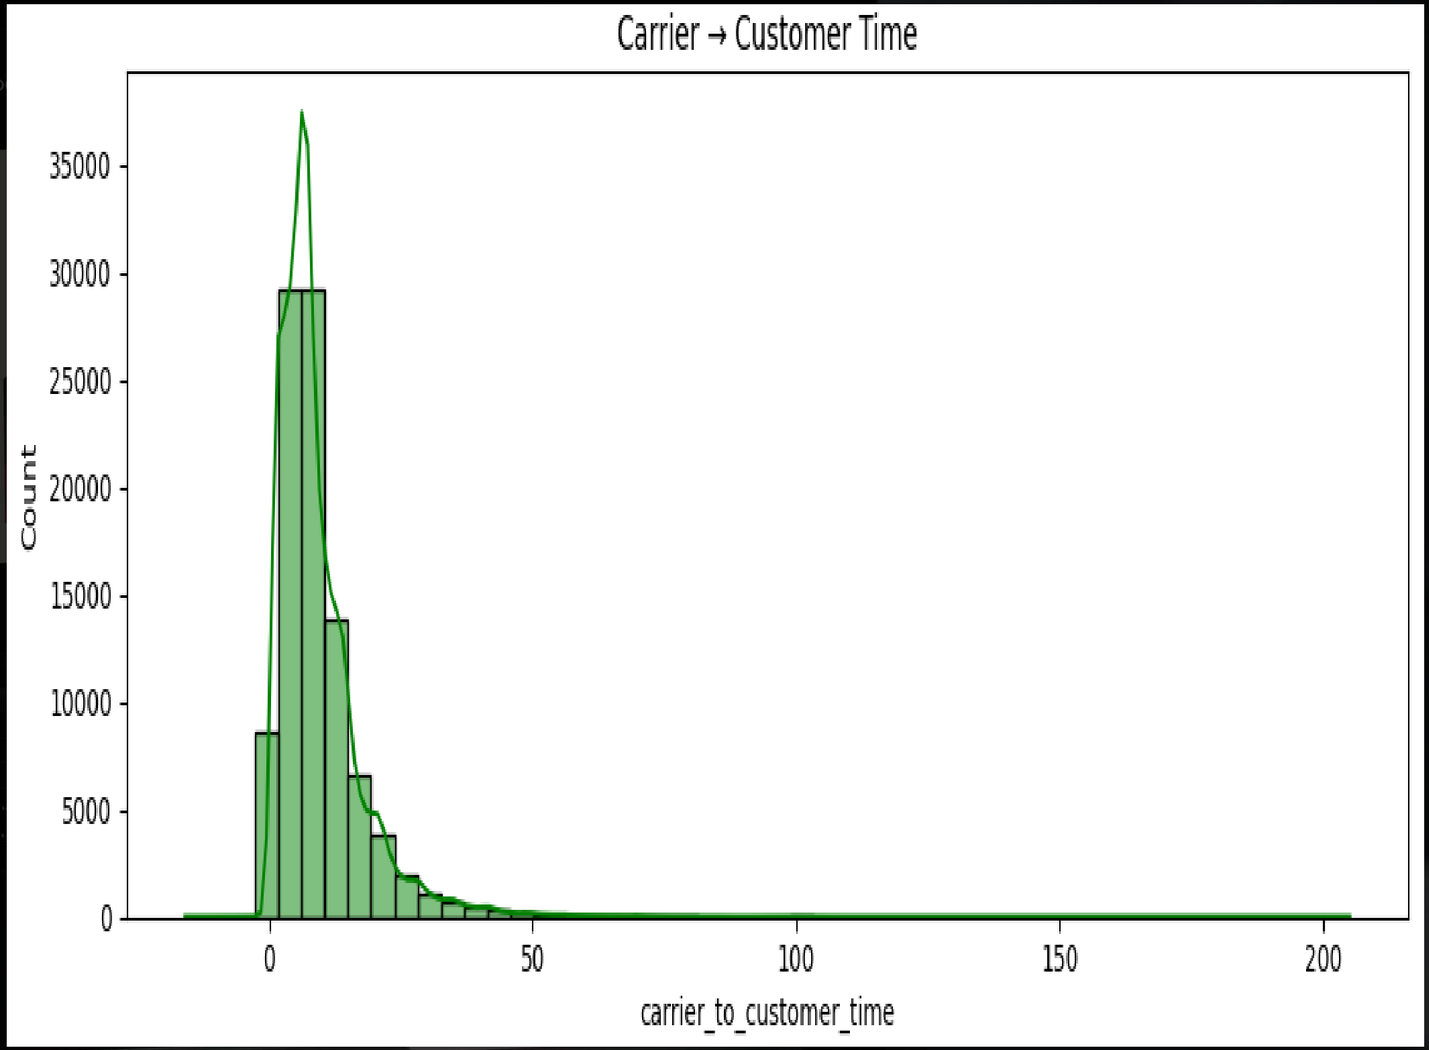
Root Cause Analysis for delay

Order Approved	Org → Carrier	Carrier → Customer	Total Delivery
~0 days	~2–3 days	~7–9 days ⚠	~12 days

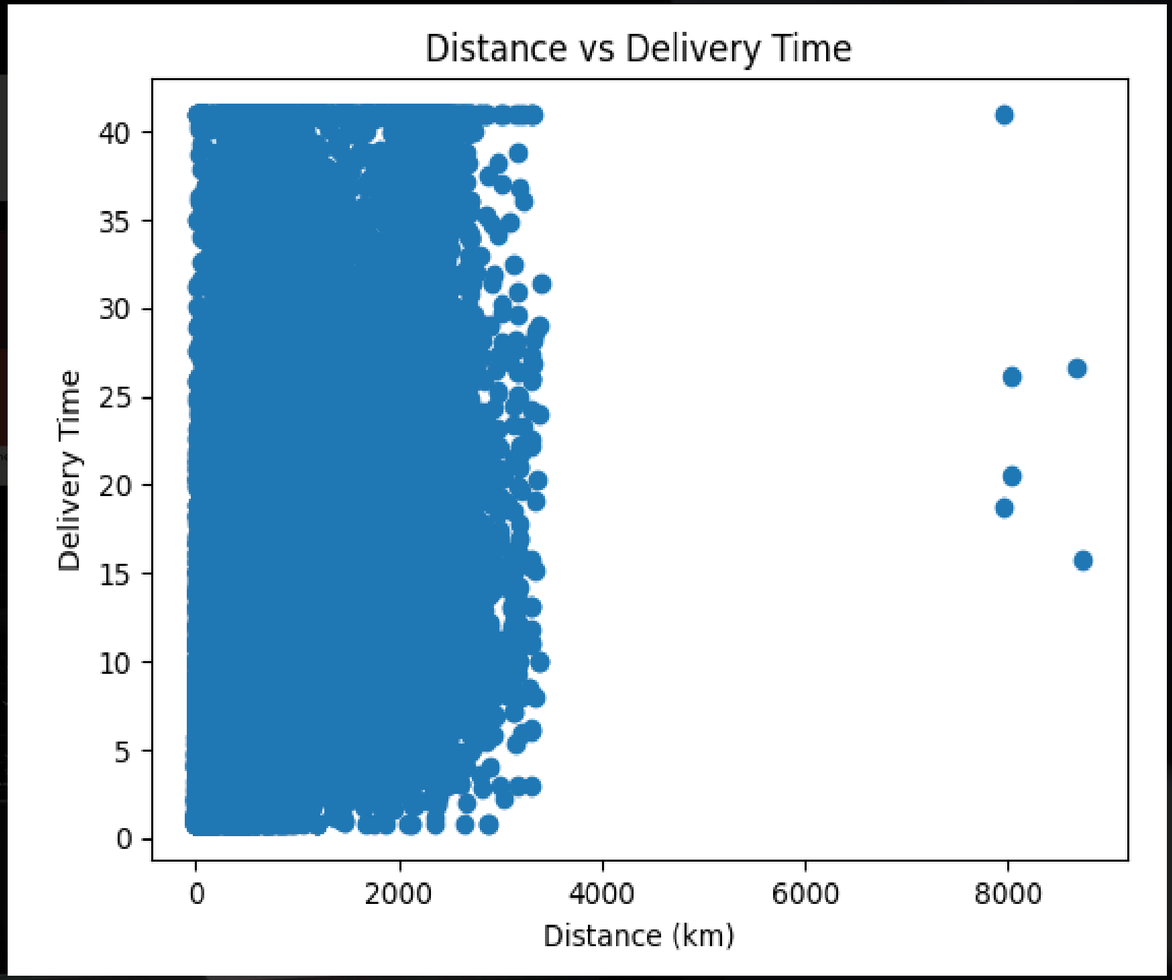
Root Cause Analysis for delay

Carrier → Customer is the main bottleneck **(≈ 7–9 days median)** and accounts for the majority of delivery time?!!



Root Cause Analysis for delay

- Most deliveries occur within 3000 km.
- There is a moderate positive relationship between distance and delivery time.



- **There are points 8000 km apart. This is strange because Brazil is only about 4300 km wide?!!**
